

PROJECT PROFILE

## Louvre Systems

### AGP Finline Louvres

#### York Apartments

Shortland Esplanade - Newcastle East NSW Australia

To provide practical wintergarden spaces without detracting from the million dollar views of Newcastle Beach, AGP operable glass louvres were chosen for the eastern facade of this luxury apartment building. With the added bonus of providing a striking facade presence, the large frameless glass louvres maximise the amount of all year round liveable space, with individual apartment users able to position the louvres to suit the weather conditions.
