

# attic conversions

## Best for: creating another room or two in your attic.

A roof space conversion is a cost-effective option to **create more space in your existing home whilst adding additional value to your property.**

Our award winning conversion division, Attic Living, is the expert in creating a new living area, bedroom, bathroom or study from your dark and dusty attic space.

Attic Living looks after all aspects of the planning and construction process with design work, engineering, permits, council approval, certification, building, management and supervision all taken care of.

We provide a clear process and pride ourselves on the flexibility, helpfulness and communication skills of our consultants, supervisors and build teams.

We understand that we are working in your home and therefore we make every effort to minimise disruption, noise and mess.

With conversions starting from \$80,000, a spacious home is now within reach.

### Key benefits:

- ▶ Cost-effective option to gain more living space
- ▶ No need to move
- ▶ Clear build process
- ▶ Dedicated project manager
- ▶ Add value to your property
