EXPERIENCE DECOWOOD...

...the stunning timber look that never needs painting. DecoWood powder coating combines the natural beauty of timber with the proven strength and durability of aluminium.

BEAUTIFUL

DecoWood offers a choice of twelve beautiful wood grain finishes on aluminium all with a warm, textured finish. DecoWood is ideal for use on windows, doors, slats, privacy screens, shutters, louvres, fencing and gates. DecoWood is low maintenance, never needing painting or sealing...ever.

DURABLE

DecoWood is a marine grade powdercoating that boasts a ten year warranty*. It is also suitable for bushfire designated locations (BAL 40) where timber is not permitted.

Unlike timber, DecoWood aluminium is long lasting and dimensionally stable, meaning no more warping, splitting or cracking.

SUSTAINABLE

Using DecoWood instead of timber reduces logging and the amount of harmful greenhouse gases (Volatile Organic Compounds) released into the atmosphere caused by painting and staining.

DecoWood aluminium products are easily recycled, can be recycled many times and require very little energy to do so.

*Application for warranty in writing. Availability subject to location and use.
