custom joinery manufacturers

Forest  
Stewardship  
Certified

# hampton & larsson

**Hampton and Larsson** is a joinery manufacturer specialising in custom made timber doors and windows. Established in 1946 we are a third generation family business which has developed a solid reputation for producing quality joinery with both residential and commercial customers. In August 2005 Hampton and Larsson became the first joinery in Australia to obtain international certification from the Forest Stewardship Council (FSC) for joinery manufacture.

The Forestry Stewardship Council (FSC) is an independent, non-government organisation promoting the responsible management of the world's forests. Headquartered in Bonn, Germany, the FSC was founded in 1993 in response to public concern regarding deforestation and the demand for a trustworthy method of wood-labelling. It is the only system endorsed by such major environmental groups as WWF (Worldwide Fund for Nature), Wilderness Society, Greenpeace and Friends of the Earth.

Our FSC Chain of Custody certification means that timber used in the production of so-labelled commercial and residential doors, windows and stairs, is guaranteed to have been sourced in forests which are managed according to a strict set of environmental, social and economic standards, recognised worldwide and/or from non controversial sources.
