Kitchen mixers

AXOR[®]
hansgrohe

More than 100 years experience in everything to do with water, make Hansgrohe, producer of fittings for bathroom and kitchen, an expert in these two living spaces. The result are fittings of technical and aesthetic perfection. Hansgrohe kitchen mixers set standards in functionality and quality. Those of the Axor brand also offer a wealth of design highlights for your individual kitchen, which all adds up to pure pleasure.

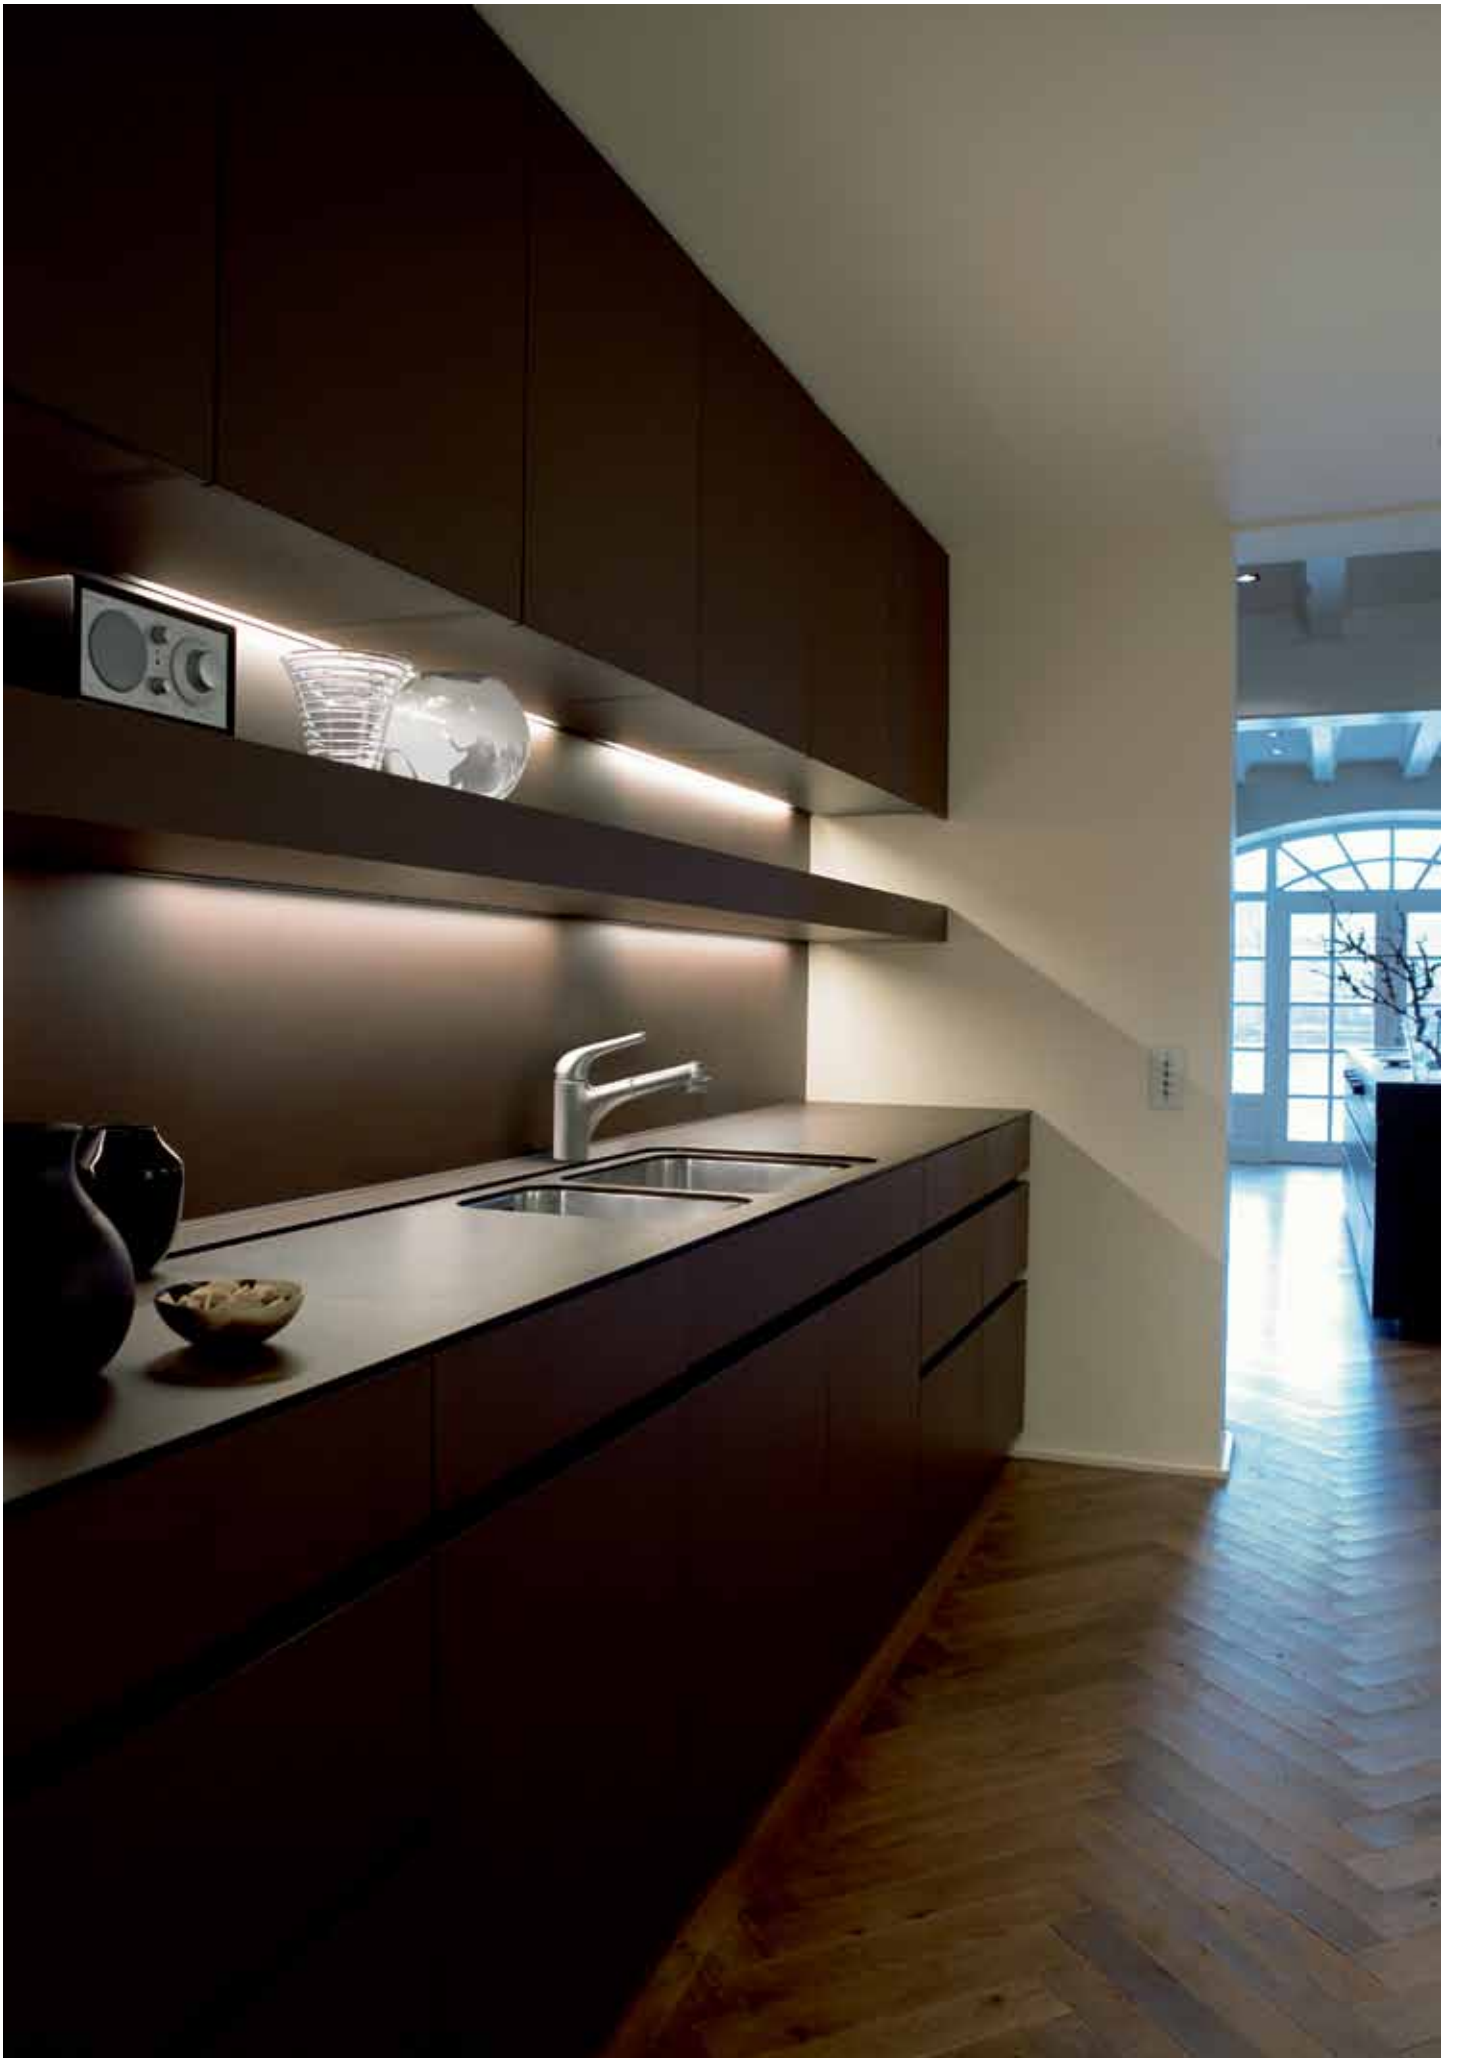

You can eat food purely to nourish your body, or you can eat for enjoyment, with all the senses, delighting your nose and eyes and pleasing your palate. This is the character of the Axor kitchen mixers, which do far more than just provide water; they also win you over with their beauty. The different design collections are as individual as the people they were made for. Axor kitchen mixers are perfect in every respect – in design, quality and functionality. Be inspired!

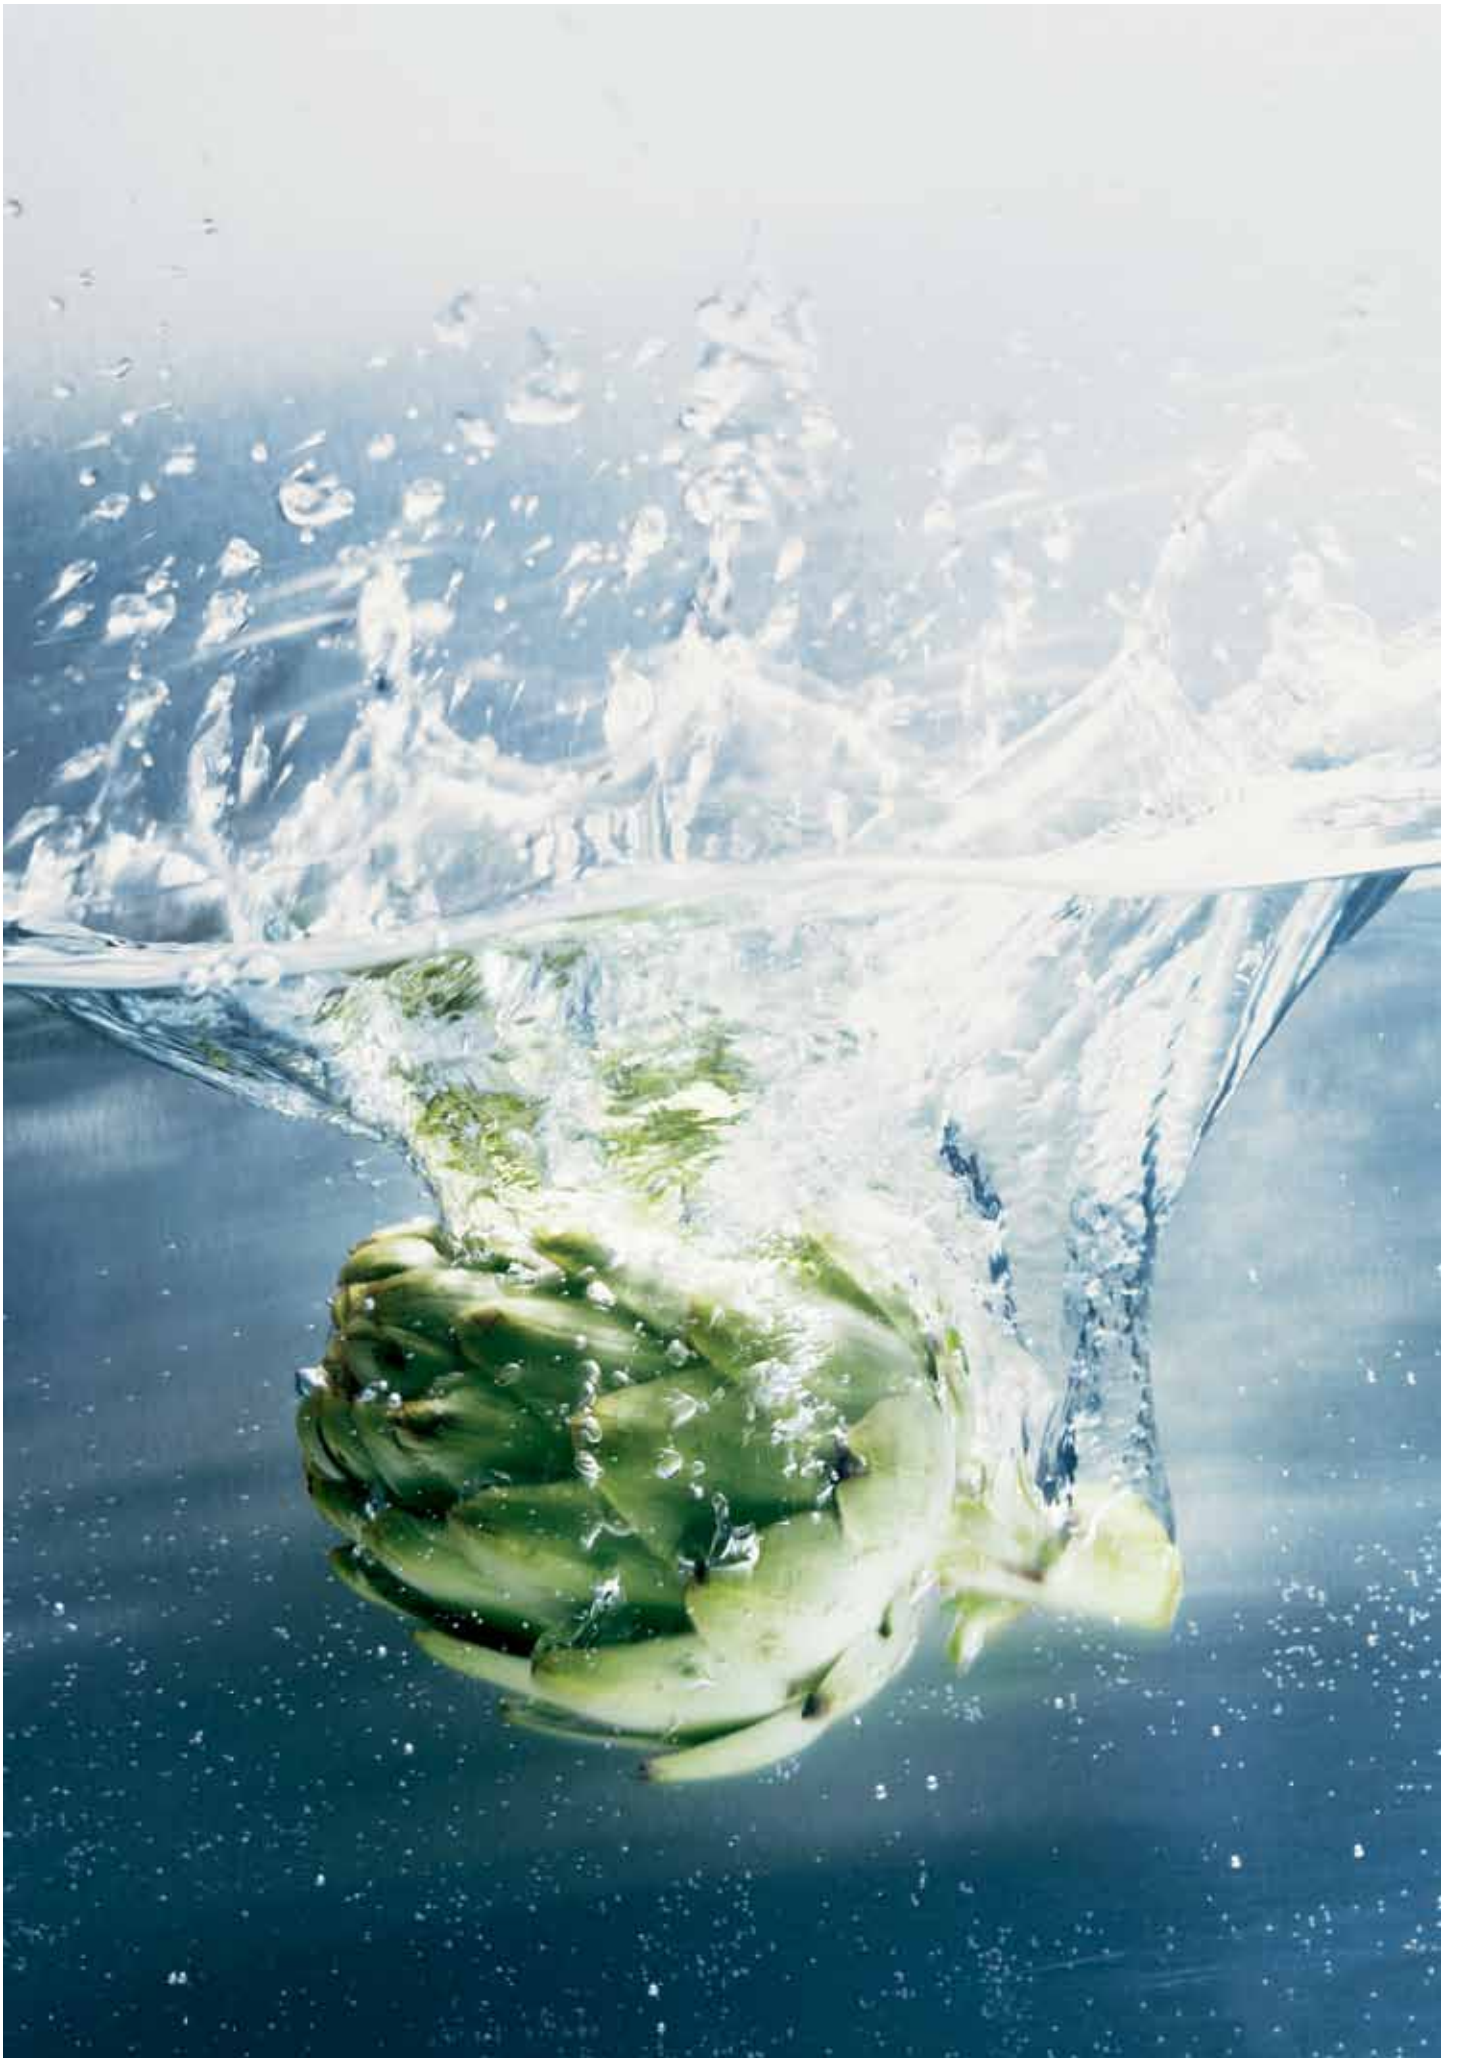

Axor[®] Steel

Stainless steel: almost no other material is as durable, hygienic, easy to clean and environmentally friendly. These properties make stainless steel perfect for the kitchen. Axor Steel kitchen mixers offer a lot of hidden qualities that make them very much worth having. In addition, their shape expresses solidness and long lasting quality.

designed by Phoenix Design

For many, the pleasure of a good meal starts with cooking – choosing fresh ingredients, washing and cutting the vegetables ... A Hansgrohe kitchen mixer is an essential, reliable tool to help with all these preparations. Thanks to solid workmanship, high-quality materials and sophisticated technology, our mixers are extremely robust and durable. And – something guaranteed to make cooks especially happy – there is a Hansgrohe kitchen mixer to suit every taste.

workmanship guaranteed

Metropol[®] E

Metropol E kitchen mixers from Hansgrohe demonstrate style and class in every respect. Straightforwardly functional, ergonomically designed, they are valuable kitchen helpers in the truest sense. Metropol E from Hansgrohe: a modern classic with a practical pull-out spray that makes things a lot easier!

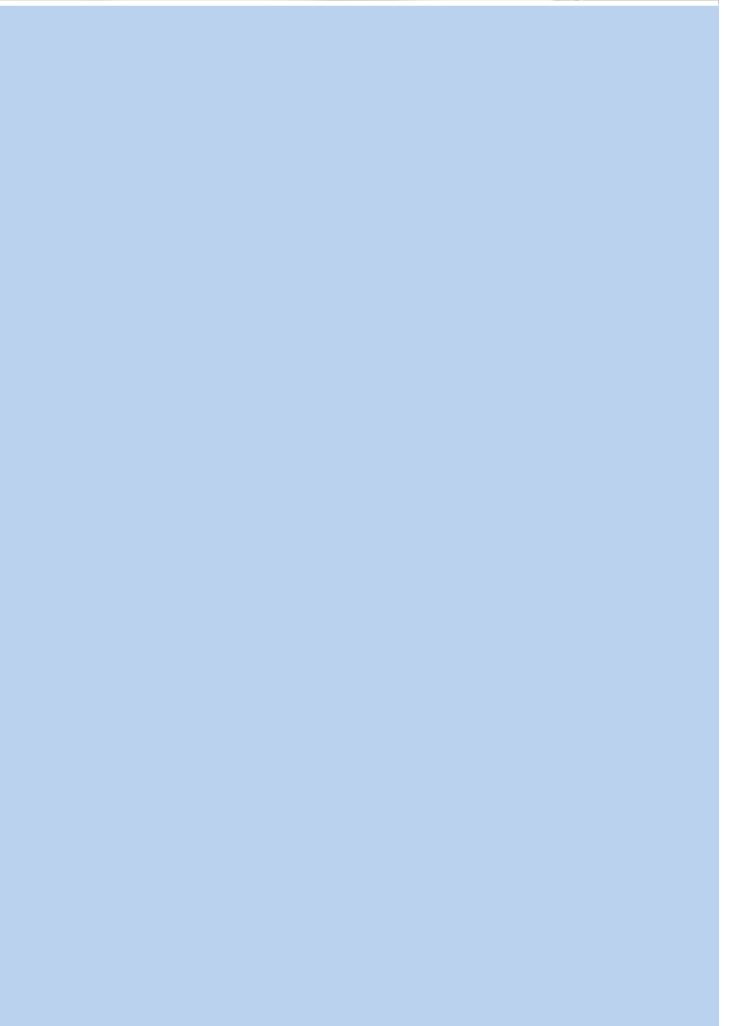

Talis[®] S

Talis kitchen mixers from Hansgrohe show that excellent quality and good shape need not always be expensive. Talis S brings clear functionality and pure design to the modern kitchen. Talis: the kitchen mixer that always fits.

Talis[®]S² Variarc

Timeless elegance and intelligent functionality: The extraordinary height and arc of the Talis S² Variarc kitchen mixers from Hansgrohe is their recipe for success. This distinctive design feature allows for much greater scope of movement when working in the kitchen. The fold-down function in the pull-out spray or spout models permits the mixer to be mounted in front of a window, as it can easily be lifted and folded down when required.

If you want to increase your radius of movement by 50 cm, you can choose the Talis S² Variarc or the pull-out spray model that offers both normal and spray mode. This model is equipped with a magnetic insert which reliably keeps the hand spray in place.

The Talis S² Variarc kitchen mixer offers a swivel area of 110° or 150° to match any kitchen sink.

Focus[®]

Hansgrohe's Focus kitchen mixers combine excellence in technology with a high standard of design- at a very reasonable price! With these high-quality mixers you can choose among two different models. Focus E² captivates with its lively silhouette and ergonomic handle, while Focus S impresses with its minimalism and a hint of avant-garde.

Focus S with fixed spout

Product features

General product features

Ceramic cartridge

Thanks to specially hardened plastics, the M3 and M2 ceramic cartridges guarantee long life for the mixer. With its wedge-shaped control lever, the Boltic lever lock ensures smooth, wobble-free operation.

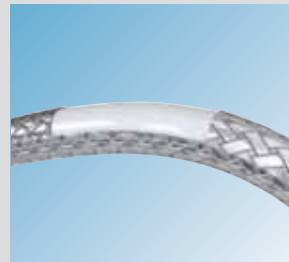

QuickClean®

It is virtually impossible for lime scale deposits to take hold on the elastic silicon screen. Should deposits still appear, you can easily rub them off with your finger.

Simple installation

Flexible G1/2 connection hoses make it easier to install the mixer.

PEX hoses

The temperature resistant PEX hoses comply with the new drinking water regulations. They are microbiologically pure and neutral in taste and smell.

Features of mixers with a pull-out spray/pull-out spout

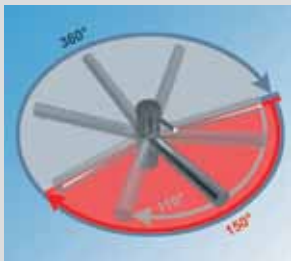

Pull-out spray/pull-out spout

The pull-out spray and the pull-out spout extend to cover an area with a radius of 50 cm. The smooth-flowing fabric hose and the plastic-coated hose weight slide almost noiseless back into the mixer body. Also, the pull-out spray makes it extremely easy to choose between the two modes, normal and spray.

Further product features

Swivel area

These mixers offer you either a limited swivel area or all-round freedom of movement.

Extra high spout

Offers huge room for movement and is ideal for filling pots.

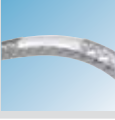

Variable handle position

The handle can be positioned on the right or the left to suit personal preference.

Fold-down function

Ideal for mounting in front of a window; simply lift the mixer and fold down when required.
