

PROJECT: HERMÈS
 SITE: CNR ELIZABETH ST & MARKET ST, SYDNEY
 PRODUCT: DAMAGE CONTROL ANTI-GRAFFITI FILM
 HPWF CONTACT: HPWF NSW
 WEB: www.hpwf.com.au
www.hpwf.co.nz

Details on Architect, Designer, Engineer and Builder may be obtained on request.

This international designer label store faces problems of vandalism and graffiti, thus undermining the integrity that the brand has developed through sophistication and quality. The solution for Hermès was to install Anti-graffiti film onto the shop front and entry doors. Anti-graffiti Film in this instance was the perfect solution - allowing the stunning Australian Ballet costume display to remain visible by passers by during the day, whilst allowing graffiti to be dealt with without the need for costly glass replacement.

This effective graffiti solution is a clear and cost effective solution to the social problem of graffiti and can be applied to a variety of surfaces, specifically commercial glazing applications. Ask HPWF to provide a solution to your graffiti challenge today. Simply visit the website for details.

PROJECT: AUSTRALIAN MUSEUM
 SITE: 6 COLLEGE ST, SYDNEY
 PRODUCT: DAMAGE CONTROL SAFETY FILM
 HPWF CONTACT: HPWF NSW
 WEB: www.hpwf.com.au
www.hpwf.co.nz

Details on Architect, Designer, Engineer and Builder may be obtained on request.

The famous Australian Museum, located in the heart of Sydney, is the nation's oldest and largest history museum, displaying some of Australia's finest and most precious flora and fauna. With such rare and fragile exhibition material, it was vital for the museum to protect such exhibits and ensure an unimpeded display for visitors.

The solution was Damage Control Safety Film. This application not only ensured that the contents of the displays could be protected effectively, but it also ensured the safety of museum visitors, in terms of preventing accidental glass breakage.

This solution was perfect for the museum as it ensured that the birds in all their varieties, colors, shapes and sizes could be enjoyed by visitors up close without hindering the viewing experience.

This important safety solution can be applied to commercial buildings, shop fronts or display cabinets large or small. Ask HPWF to provide an advanced solution for glazing protection to your facility today. Simply visit the website for details.

PROJECT: OPTUS SHOP, CAMBERWELL

SITE: BOURKE RD, CAMBERWELL

PRODUCT: DAMAGE CONTROL
ANTI GRAFFITI FILM

HPWF CONTACT: HPWF VIC

WEB: www.hpwf.com.au
www.hpwf.co.nz

*Details on Architect, Designer, Engineer
and Builder may be obtained on request.*

Located on a busy street corner with full height windows, this Optus retail site is vulnerable to vandalism and graffiti. For protection of their stock, High Performance Window Films applied 'sacrificial', Anti-graffiti film.

Anti-graffiti window film provides a cost effective solution to vandalism, scratching or malicious damage and can be easily removed and replaced to maintain the smart appearance of any retail shopfront.

It is suitable for exterior application to any glass or smooth metal surface, including lifts, sides of escalators, bus shelters, tram and train windows and even mirrors in the bathrooms of public places. It can be used in any high pedestrian traffic area to protect signage or retail shop fronts.

More examples of this sacrificial film can be found on the HPWF website.

Ask HPWF to provide an effective solution to your Anti-graffiti challenge today.

PROJECT: BOURKE STUDIOS

SITE: 600 BOURKE ST MELBOURNE

CLIENT: PROBUILD

PRODUCT: DC 2645

HPWF CONTACT: HPWF VIC

WEB: www.hpwf.com.au

www.hpwf.co.nz

Breakage of glass in buildings due to impurities at the time of manufacture is an unfortunate occurrence. Safety of occupants and a duty of care to those outside or far below in the case of high-rise buildings is a paramount concern. Clear safety film can alleviate the concern where there is a known threat or previous experience of breakage.

This important safety solution can be applied to commercial buildings large or small. Ask HPWF to provide an advanced solution to your risk management assessment today. Simply visit the web site for details.

Safety and Security Films

PROJECT: BOEING

SITE: 363 ADELAIDE ST BRISBANE

CLIENT: INVESTA PROPERTIES LTD

PRODUCT: DC 2645

HPWF CONTACT: HPWF QLD

WEB: www.hpwf.com.au

www.hpwf.co.nz

Boeing needed an engineering solution to a problem of glass breakage in their Brisbane building due to nickel sulphide impurities. In commercial buildings, consideration must be given to the safety of staff and the public outside. Safety film installed to the glass minimizes the risk.

This important safety solution can be applied to commercial buildings large or small. Ask HPWF to provide an advanced solution to your risk management assessment today. Simply visit the web site for details.

Safety Security and Anti-graffiti Films

PROJECT: ANZAC WAR MEMORIAL

SITE: HYDE PARK, SYDNEY, NSW

PRODUCT: DC 5321

HPWF CONTACT: HPWF NSW

WEB: www.hpwf.com.au
www.hpwf.co.nz

The heritage importance of Sydney's Anzac War Memorial in Hyde Park insures it has high tech protection from vandalism and graffiti. At night, glass walls pop up from below ground closing the memorial off to the public. Unfortunately glass is susceptible to the social problem of graffiti. The solution for the War Memorial was to install Anti Graffiti film onto the glass walls. The versatility that film offers also enabled a pattern to be printed thus making the glass part of the heritage story.

This effective graffiti solution can be applied to a variety of commercial glazing applications. Ask HPWF to provide an effective solution to your anti graffiti challenge today. Simply visit the web site for details.

Safety Security and Anti-graffiti Films

PROJECT: SEBEL PIER ONE HOTEL

SITE: THE ROCKS, SYDNEY, NSW

PRODUCT: DC 2645

HPWF CONTACT: HPWF NSW

WEB: www.hpwf.com.au

www.hpwf.co.nz

Plenty of buildings around Sydney Harbour lay claim to have stunning views of the famous stretch of water, yet none can boast of a view under the harbour like the Sebel Pier One Hotel in The Rocks. The Hotel foyer features a stunning glass floor allowing guests to literally look into the water. Amazed guests are not content with standing and peering into the depths and have taken to sliding the furniture around the floor to grab an ideal view. This activity places the glass at high risk of being scratched which would result in costly glass replacement.

The most cost effective solution was to place clear Damage Control Film onto the glass floor. Factored into the ongoing maintenance costs of the building, this film is simply replaced when needed and the stunning view into the harbour is maintained for guests to enjoy. This effective damage control system can be applied to commercial buildings large or small. Ask HPWF to provide a cost effective solution for glazing protection to your facility management program today. Simply visit the web site for details.

Details on Architect, Designer, Engineer and Builder may be obtained on request.

Anti-graffiti Films

PROJECT: GLASS BRIDGE PERTH

SITE: KINGS PARK WALKWAY

CLIENT: ARMOURGLASS

PRODUCT: DC 4000

HPWF CONTACT: HPWF WA

WEB: www.hpwf.com.au

www.hpwf.co.nz

The famous Kings Park in Perth has a stunning walkway that takes visitors through the treetops. Glass balustrades insure the view is unimpeded yet also pose a potential graffiti threat. Anti-Graffiti window film provides a clear and cost effective solution to this social problem.

This effective graffiti solution can be applied to a variety of commercial glazing applications. Ask HPWF to provide an effective solution to your anti graffiti challenge today. Simply visit the web site for details.

Security Films

PROJECT: GOLD COAST CITY COUNCIL
SITE: NOT DISCLOSED
PRODUCT: ENERGY MANAGEMENT FILM/
SECURITY FILM
HPWF CONTACT: HPWF QLD
WEB: www.hpwf.com.au

*Details on Architect, Designer, Engineer
and Builder may be obtained on request.*

The Gold Coast City Council, like many responsible building managers around the world are looking to protect their people and property from the potential dangers of flying, falling or broken glass or simply protection against break-in or vandalism. Clear or tinted safety films (HPWF's Damage Control Film) can alleviate the concern where there is a known threat or previous experience of breakage. This important safety solution can be applied to commercial buildings large or small.

At HPWF we specialise in the provision of security window film for locations across the country and around the world. Our dedicated Security Window Application Team (SWAT) is trained in the assessment, provision and application of security window film for commercially or politically sensitive buildings.

Our experience spans a broad range of sectors including government agencies, business and not-for-profit agencies, wherever they are at work in high risk areas with high level security considerations.

Ask your HPWF representative about an obligation-free threat assessment and window film recommendation to meet 'Duty of Care' requirements for your personnel, clients and tenants.
