

# Get the edge

The Aluminium Edge for lawn, garden, paving and bitumen.

**LINK  
EDGE**

40mm

VARYING  
HEIGHTS OF  
40MM, 50MM,  
75MM & 100MM.

available  
in 2m  
and 3m  
lengths

1

SELECT THE LINK EDGE HEIGHT AND LENGTH THAT BEST SUITS THE PROJECT TO BE UNDERTAKEN.

2

JOIN EACH LENGTH OF LINK EDGE WITH A CONNECTING FISH PLATE AND SHAPE AS DESIRED.

3

SECURE THE LINK EDGE SHAPE TO THE GROUND BY HAMMERING EDGE SPIKES THROUGH PRE-PUNCHED HOLES.

Cement as an edging will crack, can be tricky to lay and is time consuming. Plastic will break down and become brittle in the sun. Timber as an edging will soon deteriorate in a short period. Link Edge is **time and economically efficient** with the usability and **strength** of steel, yet it **will not rust** and leave sharp edges. It is completely **flexible** and can form curves, circles and straight lines with ease. Also available in a range of powdercoated colours. Never before has an edge offered this much.
