

Help Safe Storage Solutions

The Help Safe over the bonnet storage system is an all aluminium product designed to increase storage in unit car parks and garages, without restricting the room you need to park your car.

There is often limited storage space in many apartment buildings, especially for storing bulky items. In addition, some buildings do not have lock-up garage facilities but have designated car parking spaces only. Help Safe Storage Solutions have been designed to utilise the area above the car parking space, it has sufficient room to park the bonnet of a car underneath, without impinging upon the car park itself. Help Safe Storage neatly reduces the clutter often seen in apartment garage floors, as it can house a variety of valuables and bulky items. The sturdy framework guarantees the compartment will not collapse once filled.

Each compartment comes with a three-point locking mechanism, so belongings are secure from damage and safe from theft. As the compartment is raised off the ground, possessions are protected from fire, water, dust and vermin. Help Safe Storage is one of the safest, strongest, most versatile storage solutions available.

An enclosed cupboard option is available where a car does not need to park underneath. This option provides an additional 2.7 cubic m storage space.

Mailsafe Mailboxes

Mailsafe Mailboxes have been manufacturing quality mailboxes for over 25 years. Mailsafe specialises in modular mailbox units (banks) for unit and townhouse developments, retirement villages, shopping centres & commercial premises. An extensive range of quality designed mailboxes allows customers flexibility in choice. Mailsafe is one of the few Quality Assured manufacturers of mailboxes in Australia. Our mailboxes are manufactured from fully extruded aluminium and our streamlined procedures ensure every mailbox we build is of the highest quality. Manufacturing processes for the custom-built range of mailboxes permits the dimensions of the mailbox to be altered (width, height and depth) to suit your specific project requirements.

Mailsafe Mailboxes have water resistant qualities and are made from powdercoated, lightweight, durable aluminium to withstand harsh Australian weather conditions.

Mailsafe Mailboxes and Help Safe Storage Solutions are all products of Help Enterprises Manufacturing, a Quality Assured commercial division of Help Enterprises

Since 1968 Help Enterprises, a community based not-for profit organisation, has been providing assistance, support and employment opportunities for people with disabilities. Our purpose is to provide people with disabilities vocational and pre-vocational training, personal development, access to employment, job support and a career. The many divisions of Help Enterprises, including Help Enterprises Manufacturing, support the belief that people with a disability can gain independence and skills that will enable them to add value in industry and to their community.

Quality & Innovation

## Mailsafe Product Range

MSF2 & MSF3

Designed to reduce lead times and allow customers to have their mailbox on demand, the MSF range has revolutionised the mailbox industry. The MSF2 and MSF3 mailboxes are capable of receiving large quantities of mail, including A4 envelopes and magazines without folding. The flat floor of the mailbox means that the mail cannot catch on internal protrusions as it is being delivered, thereby eliminating the risk of mail protruding from the aperture slot after delivery. Mail is also easier to retrieve from the flat floor. The straight aperture cowl (weatherhood) provides a modern, stylish look and does not restrict the receipt of large quantities of mail in the way of some mailboxes with curved weatherhoods.

The MSF3 is especially suited to situations where width restrictions apply, as the box is narrower across the front and deeper. Setting the MSF range apart from the competition is the added feature of a single panel roof, as there are no joins in the centre it provides additional protection from the rain. In addition, all external rivets and screws are counter-sunk for a safer, neater look. The MSF range meets the design requirements of Australia Post.

APR2 & APR3

The APR2 and APR3 are Australia Post Recommended mailboxes. These mailboxes can be manufactured as a standard sized mailbox, or as a custom built mailbox to suit your design or dimensional requirements. The flat-floored APR2 and APR3 mailboxes are large enough to receive an A4 envelope or magazine without folding or accidental protrusion. The APR3 is especially suited to situations where width restrictions apply, as the box is narrower across the front and deeper. All the features of the MSF range are incorporated in the APR mailboxes. However, the APR mailboxes are slightly larger than the MSF mailboxes as they feature a sturdy individual framework around each bank or single mailbox, thereby providing even greater mail security.

7 & 7L

The Series 7 and 7L are mailboxes designed to fit 200mm block work installations. They will not hold A4 envelopes without folding but will receive most residential mail.

## Mailbox Range Dimensions

### Example Project:

A project requiring 70 mailboxes in one bank would require 7 rows and 10 columns.  
 For the MSF2 total dimensions would be: Height = 1165mm x Width = 3394mm x Depth = 244mm  
 For the APR3 total dimensions would be: Height = 1267mm x Width = 2448mm x Depth = 350mm  
 For the 7 Series total dimensions would be: Height = 952mm x Width = 3148mm x Depth = 210mm

## Powdercoating

Equipped with an in-house powder coating facility which ensures the ability to control the quality of the supplied product from beginning to end, Mailsafe and Help Safe Storage Solutions can offer a wide range of powdercoat colours.

30 standard colours (refer to colour chart)  
 Several premium colours  
 Two-toned colours available upon request

## Colourchart

**Powdercoat Colour Disclaimer**  
 The colours represented on this chart are as close to the actual colours as modern printing processes allow.

## Help Safe Storage Solutions Product Range

**STF1**  
 The STF1 storage compartment consists of one or two large compartments, depending on availability of space. It is manufactured with four stands, with adjustable feet, thereby allowing for the height of the compartment/s to be varied to accommodate differing vehicle heights. An enclosed cupboard option is available to the bottom of the main compartment if required.

**STF2**  
 The STF2 is manufactured using the same technique as the STF1 however, increasing the height of the space below by reducing the height of the compartment, allows for higher vehicles to fit underneath. This option is most suitable for 4WD

## Standard Features

- Adjustable feet for uneven floors
- No rusting all aluminium construction
- Secure 3 point lockable door
- 65mm x 65mm box section stands and frame for strength
- Gas struts for easy door opening and closing
- 3.2 or 2.4 cubic metre 500Kg capacity extra storage
- Attractive powdercoated frame from the Mailsafe standard colour range to match your needs - panels will be natural anodised

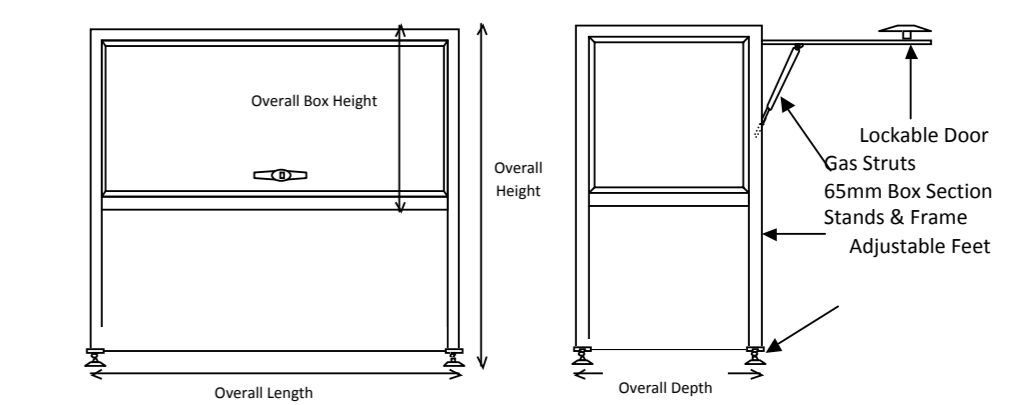

## Optional Features

- Internal shelving
- 4wd height inclusions (STF2 range)
- Installation (restrictions apply)
- Enclosed cupboard option where car does not need to park under
- Removable cupboard on wheels (work bench cover also available)
- Unit Numbering
- Front and side panels powdercoated to suit frame (excludes top and back panels)
- Full powdercoat colour option available - excluding back and top

## Help Safe Storage Dimensions

Product Range	Overall Length	Overall Box Height	Overall Depth	Overall Height	Approx. Volume
STF1	2510mm	1170mm	1100mm	2220mm	3.2 cubic m
STF2	2510mm	870mm	1100mm	2220mm	2.4 cubic m

Average feet height in above overall height dimensions is 50mm - these can be adjusted between 45mm and 90mm

**Disclaimer**  
 Each Help Safe Storage compartment can hold up to 500Kgs evenly across the floor of the compartment. Help Enterprises Manufacturing takes no responsibility for over packing.

“Add value to your investment by installing the Help Safe Storage Solutions over the bonnet compartment...”

**Water Entry Disclaimer**  
 Mailsafe advises that our Quality Assured manufacturing department takes every care to manufacture a mailbox to meet the Australian and New Zealand Standards (AS/NZS 4253:1994), and provide water resistant qualities. However due to the functionality of the mailbox i.e. the inclusion of an aperture slot, achieving complete prevention of water entry is not feasible.

**Dimensional Disclaimer**  
 Mailsafe advises that our Quality Assured manufacturing department takes every care to ensure our mailbox dimensions accurately equate those quoted in these charts. However, Mailsafe takes no responsibility for any minor discrepancies between our measuring devices and those of our customers.
