With MiTek's
TRUSSPACERS you're
as safe as houses

* Winner of the HIA Jim Sweeney Industry Innovation Award for 2003.

Patent Pending
** The code for 'Installation of Nail Plated Timber Trusses'.

With OH&S taking a more aggressive outlook on unsafe work practices there's never been a better time to try MiTek's award winning* TrussSpacers. These innovative and easy-to-use products put safety first on-site, plus they actually make truss installation a whole lot easier and faster. So why take risks when you can use TrussSpacers? They will accurately and effortlessly position and temporarily hold trusses in place during construction (as required by AS4440-2004**). TrussSpacers sit flush with the truss chord while being lifted into position...and are then rotated 90 degrees and fixed to the adjoining, previously braced truss. Available from MiTek fabricators and leading hardware suppliers.
