

The SeaShell Awning

Elegant • Retractable • Waterproof • Strong

SeaShell™
A W N I N G S

The Evolution of Shade™

Surprisingly strong - set and forget

No need to worry about a sudden storm as the Seashell Awning self retracts in gale force winds. The 90° and 180° awnings meet Australian Standard AS 4055 to wind speeds up to 180 km/hr. No electricity or wiring required. Leave it open for months on end. Get years of service.

Fits where no other awnings can

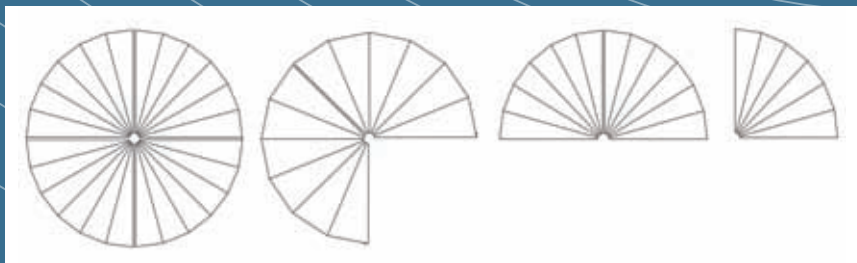

The Seashell Awning can be mounted on to existing structures or as a free standing unit on a pole. 90° awning fits snug into corners, the 180° configuration easily fits along straight walls or on a fascia as a semi-circular cover and the 360° is perfect as an umbrella. The range of sizes is up to 10.4 metres in diameter and will cover areas up to 78 m².

Elegant weatherproof and retractable

Create a flexible weatherproof outdoor entertaining area. Easily retractable to let the sun shine through or open to create full shade or rain protection. Available in a variety of colours to match your colour scheme.

5-Year warranty

The Seashell is made from high quality 100% water and UV proof PVDF sail material and corrosion resistant powder coated structural aluminium and stainless steel. A 5 year warranty is provided
