

Casablanca

Overview

With design origins dating back to the 1940's, the Casablanca Venetian blind incorporates the past with the contemporary present.

The combination of Australian hardwood rails, 50mm aluminium slats and manufacture based on traditional principles, has succeeded in creating a unique and stylish modern blind.

Simple and effective cord operation and co-ordinated accessories make this blind practical and functional.

The look of the Casablanca can be enhanced with the choice of either ladder string or cloth woven ladder tape and the option of either solid or perforated slatting in a range of customised colours.

High build quality and finish affords the Casablanca a place in any interior design setting.

Specifications

The fine Tasmanian Oak head, base and tilt rails, can be stained in walnut or maple and may be polished upon request. Custom staining and painting is also available as a further alternative.

The slats are manufactured from high grade, extremely durable aluminium alloy and are available in either solid or perforated contemporary colours.

The Casablanca allows you to create the blind you desire to suit your surroundings.
