World of Styles.

QuickClean®. No chance for lime scale thanks to the QuickClean anti-lime scale function. Lime scale on the elastic silicone nipples can be simply rubbed off.

Focus® S. Cylinder, sphere and cone – these geometric shapes are the foundation of the FocusS mixer line. Its characteristic feature is the slim, straight pin handle which makes it a pleasure to operate.

#109961

Raindance – S150 3-Jet Shower Head
(shower arm not included)
WELS 3★ (9L/min)
#109960

Powered by AIR. At Hansgrohe every drop counts. Impressive proof of this is the latest technological innovation – AIR, from now on is used in all Raindance showers. Mixed with air, the out-flowing water becomes softer or harder, depending on the spray mode – and the daily shower becomes a feast for the senses.

For your eyes: You can truly see the enclosed air in the voluminous drops. For your ears: Like a shower of rain, the AIR sound has a calming as well as vitalising effect. And for the skin, our largest and most sensitive sense organ: The water enriched with air completely covers the body in a pleasant layer of water and air. “Powered by AIR” – with this unique technology Hansgrohe creates a new quality and sets a new shower standard. Mixing it with air reduces water consumption by about 10 % and improves the quality of the spray jet.

The AIR principle: 1 litre of water is enriched with 3 litres of air in the shower head. The result: Millions of warm, soft rain drops with Rain AIR, strong massage jet with Whirl AIR.
