

urbaneedge\_deck 143™

ultradesign composites™

A designer composite that complements the horizons of architectural and design vision.

Not a plastic imitation of wood, **urbanedge\_deck** is new age; a technological composite of wood and plastic. It is one of the new products within the **ultra design composites** selection that heralds an exciting era for designers.

Previously, a harmony of style has been out of reach through the lack of suitable materials. This harmony can now be explored; **urbanedge\_deck** is a contemporary product, appropriate for those who lead, for those who create, for those who design.

The built landscape has inspired individuals over the years, and reflects the culture and technologies of the times. This is one such product... a product of our times.

#### **PERFORMANCE GUARANTEED**

comprehensive 10 year guarantee  
exceptional resistance to oils, salt spray  
and uv exposure. Will not suffer damage from  
fungal decay or termites.

#### **MAINTENANCE FREE**

outdoor application without treatment  
no sanding or oiling and water clean up

#### **ENVIRONMENTALLY FRIENDLY**

60% reclaimed wood 40% recycled plastic -  
non-toxic

#### **MODERN DESIGNER PROFILE**

contemporary profile to suit the  
architecture of the 21st Century

'We all thought it would look recycled, sort of secondhand or a wood imitation. Imagine our amazement when this profile landed. It's a new - look product, clean and contemporary, lifting the foreshore into the serious tourist league...where it belongs.'

Geoff Dodd, Director of Operations,  
City of Port Lincoln

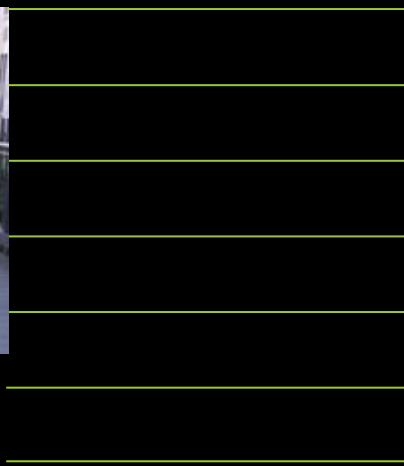

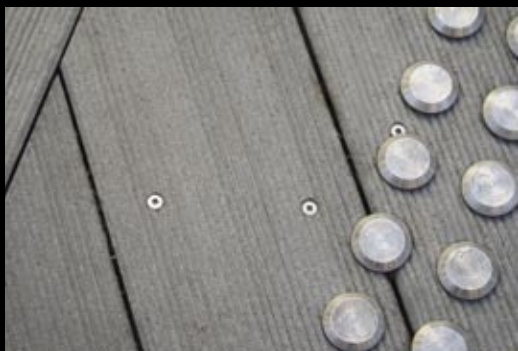

#### **PERFORMANCE TO INSPIRE ...**

Traditional timber was not giving our clients the choice of contemporary product. With 150 years in the industry we have been and continue to be inspired by the vision of contemporary design.

Urbanedge\_deck is a part of this future vision, manufactured to a modern design profile, it is environmentally friendly with an outstanding life cycle.

It's leading the way in our ultra design composites selection, which we believe will be a creative resource for future designers.
