

ZENITH

R50 LOUNGE

Features:

The R50 lounge series consists of a corner piece and multiple variations to a fixed length lounge. The continuous use of radii 50 unifies the overall element of design. "My intention was simply to design a sofa using the sort of sleek, asymmetric forms that would work in well with contemporary interiors - both commercial and domestic. I was also thinking of how people use a piece of furniture like this in different ways: sitting, lying - perching even: hence the wide low arm which could be used as a platform for trays, laptops, etc, or as a place to sit when you just don't want to commit to relaxation."

Finishes:

Stainless steel wire base; single length cushion, feather quilting wrapped around foam.
